

Remember to remember

Lord still our souls
'Til we let go
All that crowds the mind
All that's drawing our hearts away from you

Break our routine help us see
The great power of this thing we do
Make our motives true
Help us remember to remember you

We come to worship on this day
Our minds may wonder so far away
Sometimes in worship, we go through the motions
Without a notion of why we gather here

So when we enter this holy place,
Lead us to worship through prayer and praise
As we remember Your great salvation
And bring celebration of all the life you give

Lord still our souls
'Til we let go all that crowds the mind
All that's drawing our hearts away from you

Break our routine help us see
The great power of this thing we do
Make our motives true
Help us remember to remember you
To remember, to remember you
